ZODIAC INFLUENCE

What is a zodiac sign? In astrology, a sign of the zodiac refers to one of the 12 specific constellations of the zodiac that the sun passes through. However, how does the zodiac sign influence our personality? This point is not random, as the zodiac signs have a significant impact on our motivations, relationships, and general outlook on things.

In conclusion, I believe that we can consider the influence of zodiac signs, but we must not forget that we have an essence that determines our personality and way of acting. We can benefit from the positive traits associated with our zodiac sign, but we should also act in the best way possible, guided by our individuality.

DISCUSS WHAT THE MOST DIFFICULT PART OF LEARNING ENGLISH IS FOR YOU

Speaking is the most difficult part of learning English for me because, even if my grammar is incorrect, I can still communicate effectively with others if I have some speaking ability and vocabulary. For instance, in Japanese grammar, “what is your name?” is expressed as “your name is what?” Even if I speak English with Japanese grammar, others can still understand me to some extent. Therefore, the key to learning English is to overcome the fear of making mistakes and to keep speaking.

However, English learning in Japan lacks emphasis on speaking, even in language schools, which makes it challenging for Japanese people to be proactive and speak up. I’m unsure if this is due to our national character or a problem with Japanese education.

Since I am now learning English in the US, I want to be more active in speaking it. I may not be excellent at public speaking, but I understand that I won’t improve if I don’t speak English. Therefore, I’m determined to do my best!

CHOOSING A SCHOOL

What do you think is important when choosing a university?

Generally, when choosing a school, people tend to consider what can be learned, the graduate employment rate, and the cost of tuition. However, I believe that the most important factor is the type of education that can be had.

In extreme terms, studying can be done at home independently using the internet, regardless of the field. Most subjects do not necessarily require classroom lectures. However, each educator and school is different. Some schools provide valuable education that extends beyond graduation and can be useful in the workplace.

Therefore, I believe that it is important to consider the quality of education when selecting a university. In other words, attending a school where you can enjoy a fulfilling school life. I hope that you make wise decisions in choosing your school.

WHAT TYPE OF CAR WOULD YOU LIKE TO OWN?

I believe that the best type of car to own is a hybrid or electric car. The most popular electric car brand at the moment is Tesla, and there are also several hybrid car options available from various brands such as Toyota, Honda, and BMW.

These cars are the best options because they produce less pollution. The amount of CO² generated by vehicle combustion is too high globally, and owning a hybrid or electric car is a good way to help reduce it.

Another advantage of owning these cars is that they consume less fuel, which is very expensive right now. This advantage helps save a lot of money that can be used for other needs like food and bills. Additionally, electric and hybrid cars generate less noise pollution, making them a great option for drivers.

In conclusion, the best car to own is one that you can afford and maintain for a long time while keeping the costs low.

WHAT IN CURRENT EVENTS ARE YOU WORRIED ABOUT?

Recently, the banking industry has faced a challenging situation, requiring the involvement of banks, Wall Street, financial market participants, and regulatory authorities. While some may label it as a crisis, I prefer to view it as an event that necessitated action to prevent the collapse of certain banks from spreading throughout the entire economy and affecting other related institutions. Thus, I consider it a significant occurrence.

The decision by the Fed to bail out the fragile bank has attracted considerable criticism regarding the appropriateness of the measure. Since the global financial crisis in 2008, we have witnessed how the financial market and its participants react to signals from small-sized banks or temporary disturbances in emerging markets. Therefore, to a certain extent, their actions have aimed to prevent the recurrence of another financial crisis.

However, concerns and anxieties persist among the public due to the injection of public funds into private institutions. Nevertheless, without this intervention, the consequences of allowing the bank to fail would have been unpredictable. Thus, it was inevitable to take such action in order to maintain market stability.
